

Sustainability

We deeply respect people and our environment – this attitude is naturally rooted in our history and values. And sustainability is at the core of our vision statement “From nature to ingredients®”.

In order to drive our progress we will continue to set ambitious targets for reducing our environmental footprint. Furthermore, we seek to make our contribution to the overall society by being a good corporate citizen and participating in a number of global initiatives.

It is our aim through a strong sustainability focus to support our customers and thereby ultimately the end consumers in creating efficient, safe and sustainable products as well as value chains. This makes sense and gives us a meaningful purpose while, at the same time, strengthening our competitive edge and business proposition. A lot has already been achieved.
