Jungbunzlauer

*From nature
to ingredients®*

For safe feed and healthy animals

Who is Jungbunzlauer?

Founded more than 150 years ago in the village of Jungbunzlau in the former Bohemia and owned for more than 50 years by the Austrian entrepreneurial family Kahane, Jungbunzlauer is one of the world's leading producers of biodegradable ingredients of natural origin.

Living our vision "From Nature to Ingredients®", we transform renewable raw materials, like GMO-free corn in Europe, into organic acids, thickeners, sweeteners and derivatives thereof through natural, GMO-free and waste-free fermentation processes. Our product portfolio also encompasses co-products from our corn processing and fermentation processes.

What about quality and safety?

As the first choice for food experts worldwide, our ISO 9001 and FSSC 22000 certified ingredients enable our customers to produce healthier, safer, tastier and more sustainable food products. Obviously animal derived food products can only follow such principles if the animal husbandry and nutrition have followed the same principles.

As a guarantee for the supply of safe and high quality feed ingredients, Jungbunzlauer's production sites have not only been registered as feed business operators, but feed ingredients from our site in Pernhofen, Austria, have also been GMP+ certified and feed ingredients from our site in Marckolsheim, France, have been Ovocom FCA certified.

What are we offering?

Jungbunzlauer offers a broad range of fermented ingredients as well as co-products with different functionalities and benefits in animal nutrition. As some products may not be used in some countries or regions for the listed purpose as a matter of compliance with legal or regulatory restrictions, these aspects should consistently be checked with our Technical Service experts.

Protein / Nitrogen and Energy Sources

- Ammonium Sulfate
- Citrofeed 40
- Corn Germs
- Corn Gluten Feed
- Corn Gluten Meal
- Erythritol Mother Liquor
- Lacti Vinsasse

Feed and Silage Preservation

Preservative

- Citric Acid
- Lactic Acid

Buffering Agent

- Sodium Gluconate EMF

Animal Well-Being

Alternatives to Antibiotics

- Citric Acid
- Lactic Acid

Gut Health Improvement

- Gluconic Acid
- Sodium Gluconate
- Sodium Gluconate EMF

Post-Weaning Diarrhea Prevention

- Citric Acid

Mineral Fortification

- Calcium Lactate Gluconate
- Potassium Gluconate
- Tricalcium Citrate
- Trimagnesium Citrate
- Tripotassium Citrate
- Zinc Citrate
