

Jungbunzlauer

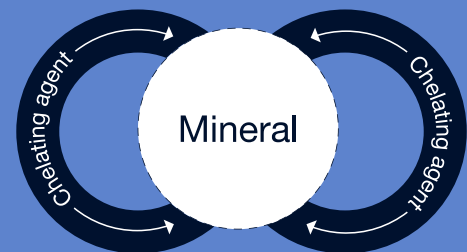

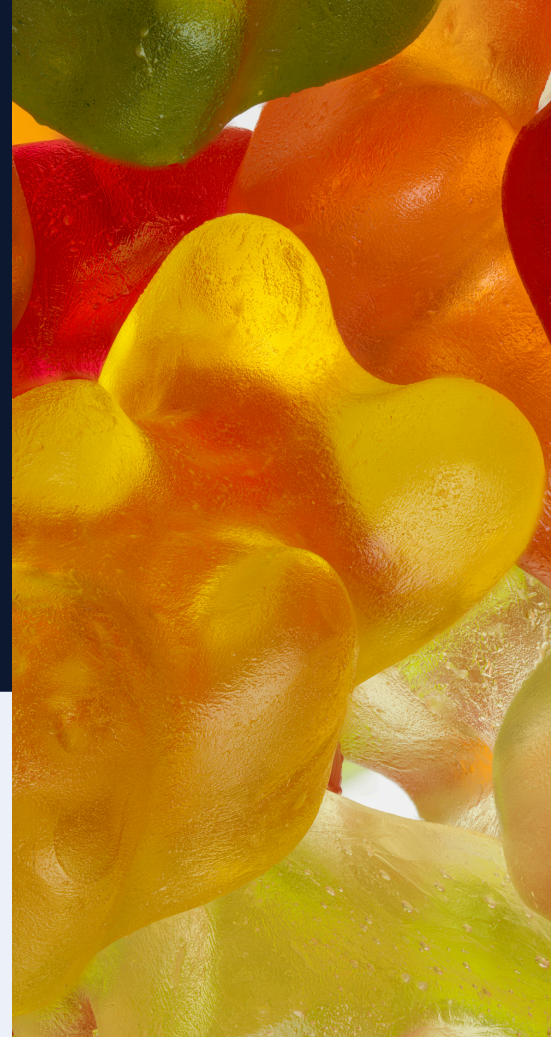

Solutions for supplement gummies

Engineered for taste,
Optimised for health

Supplement gummies continue to gain popularity as a consumer-friendly dosage form—offering great taste, ease of use, and convenience. Jungbunzlauer's high-quality mineral salts enable the effective fortification of gummies with magnesium, zinc, and calcium—without compromising taste, texture, or stability.

Our minerals are based on organic acids and are considered as nature-identical organic mineral salts. Thanks to their chelating properties, they shield minerals from inhibitors of absorption, making them significantly more bioavailable than inorganic alternatives. This makes them the preferred choice for high-performance supplement gummies.

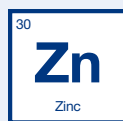

Whether targeting immune support, energy metabolism, or bone health, Jungbunzlauer mineral salts combine superior functionality with excellent sensory properties—making smart fortification simple.

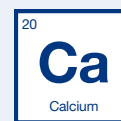

Optimal minerals for gummies

Trimagnesium citrate nonahydrate
Supports energy metabolism, muscle function, and stress reduction

Zinc citrate
Ideal for immune and skin health formulas

Tricalcium citrate
Excellent for bone and dental health gummies

Why choose Jungbunzlauer organic salt minerals for gummies?

High bioavailability

Organic citrate salts are well absorbed

Neutral taste & odour

Even at high fortification levels

Excellent dispersibility

Smooth texture and uniform distribution

Good processability

Suitable for pectin and gelatine recipes

Improved sensory experience

Micronised forms for less sandiness and better texture

High dosage possible

Smooth texture and uniform distribution
