

Purpose

Air pollution is one of the most pressing environmental issues of our time, with far-reaching impacts on health, climate, and ecosystems. The United Nations Sustainable Development Goals (SDGs), particularly SDG 3 (Good Health and Well-being), SDG 11 (Sustainable Cities and Communities), and SDG 13 (Climate Action), emphasize the need for measures to reduce air pollution. Jungbunzlauer is committed to actively contributing to improving air quality and reducing environmental impact through this Air Pollution Policy.

Scope

This policy defines air pollution as air emissions (such as NO_x and SO_x) and atmospheric pollution (including odour, noise, and light). Greenhouse gas emissions are covered separately in the Climate Change Policy. This policy applies to everyone engaged or employed by any company of the Jungbunzlauer Group, and extends to collaboration with external stakeholders.

Commitments

Jungbunzlauer aims to minimise air pollution from its business activities and ensure good air quality at its production sites and beyond. We strive to reduce emissions and promote innovative, environmentally friendly technologies that contribute to air pollution reduction.

Air emissions and atmospheric pollution at our production sites are regularly monitored to ensure compliance with all relevant legal limits, with findings reported annually in our Responsible Care report.

We are further committed to reducing air emissions and atmospheric pollution at our production sites by implementing impact-reducing technologies wherever applicable.

With regards to our supply chain, we promote the use of sustainable transport solutions and engage with our suppliers and logistic partners to discuss air pollution reduction.

Our employees receive training to raise awareness about the impacts of air pollution and to support environmentally responsible practices.

Objectives and targets

- Monitor regularly air emissions and atmospheric pollution at our production sites.
- Train 80% of our employees on air pollution topics by 2030.
- Implement impact reducing technologies where applicable.

Responsibilities and review

This policy has been approved by the Executive Committee of the Jungbunzlauer Group and is subject to a regular review at least every two years.
